			<i>Extended Total: \$25,070.00</i>	

Johnson County - Dish Machine - Jan 13

Item	Qty	Description	Sell	Sell Total
3	1 ea	INSTALLATION Custom Model No. CTS Packed: ea Installation of a new 66" dishmachine including picking up at the PASCO Warehouse, delivering to the job-site, uncrating, setting in place and making all final connections to existing utilities. Estimate includes cutting apx. 17" off the left and 5" off the right dishtables, welding, polishing and turning down to fit into the new dishmachine. The take-out dishmachine will be left on site or hauled away as scrap. Please be specific when ordering. CTS will connect to whatever electrical rough-in is supplied - 60 amp 208, 3-phase or 480v 3-phase on the same or a new service 60 or 70 amp, however the electrical must match either what is currently existing at the jail to a similar machine or whatever is changed (by the Jail or others) to match the ordered machine by the jail. There is an existing Hatco booster heater connected that CTS can either re-connect to the dishmachine or we will bypass altogether if the new machine comes with a built-in booster heater. If pulled, the booster can be hauled away as scrap if so instructed. CTS can do this work any week except the following dates (2/22 - 3/4/2013)	\$3,800.00	\$3,800.00

Total	\$28,870.00
