3. RIGHTS AND OBLIGATIONS OF PROVIDER

- 3.1 Independent Contractor. The parties agree that Provider performs specialized services and that Provider enters into this Agreement with the County as an independent contractor. Nothing in this Agreement shall be construed to constitute Provider or any of Provider's agents or employees as an agent, employee or representative of the County. As an independent contractor, Provider is solely responsible for all labor and expenses in connection with this Agreement and for any and all damages arising out of Provider's performance under this Agreement.
- 3.2 Provider's Control of Work. All services to be provided by Provider shall be performed as determined by the County in accordance with the Scope of Services set forth in Exhibit "A." Provider shall furnish the qualified personnel, materials, equipment and other items necessary to carry out the terms of this Agreement. Provider shall be responsible for and in full control of the work of all such personnel.
- 3.3 Reports to the County. Although Provider is responsible for control and supervision of work performed under this Agreement, the services provided shall be acceptable to the County and shall be subject to a general right of inspection and supervision to ensure satisfactory completion. This right of inspection and supervision shall include, but not be limited to, all reports to be provided by Provider to the County and the rights of the County, as set forth in the Scope of Services, and the right of the County to audit Provider's records.

- 3.4 Compliance with All Laws. Provider shall comply with all applicable laws, ordinances, rules, regulations and executive orders of the federal, state and local government, which may affect the performance of this Agreement. Any provision required by laws, ordinances, rules, regulations, or executive orders to be inserted in this Agreement shall be deemed inserted, whether or not such provisions appear in this Agreement.
- 3.5 Organization and Authorization. Provider warrants and represents that: (i) it is a limited liability company duly organized, validly existing and in good standing under the laws of the State of Texas, and which shall remain in good standing throughout the term of this Agreement; (ii) it has the requisite power and authority to carry on its business as it is now being conducted; (iii) it has the legal capacity to enter into this Agreement; (iv) the execution, delivery and performance of this Agreement and the consummation of the transactions contemplated by this Agreement have been authorized and approved by all action required on the part of Provider; (v) it has the right and authority to sell the software to the County; (vi) all software shall be in good working order; and, (vii) all licenses and warranties regarding the software and hardware shall be conveyed to the County.
- 3.6 No Conflict. Provider warrants and represents that the execution and delivery of this Agreement and ancillary agreements hereto by Provider does and will not: (i) conflict with, or result in any violation or breach of, any provision of Provider's charter documents; (ii) result in any violation or breach of, or constitute a default under, or require a consent or waiver under, any of the terms, conditions or provisions of any license, contract or other agreement to which Provider is a party; or (iii) conflict with or violate any franchise, license, judgment, order, statute, law, rule or regulation applicable to Provider.
- 3.7 Camera and Broadcast Operations. Although Provider is responsible for control and supervision of work and services performed under this Agreement, the County understands that the operation of the camera and broadcast system can be done remotely. Such remote operation requires access via inbound TCP port 2001, outbound TCP ports 21, 80, 443, 1935, 5721, and outbound UDP ports 53, 123. The County will need to supply the Provider with access to such TCP and UDP ports with respect to the County's Internet connection. If, such access is not given or the County's Internet connection fails during operations, the Provider will not be held responsible for remote camera operations. Additionally, in the event the Provider decides to operate such system manually, the County shall provide access to the equipment (as identified and described in the Scope of Services, page 5, "Cosmos Broadcast System") at the Site described in Section 1.2, above.
- 3.8 Warranty. Provider warrants that: (i) any streaming server hardware provided by Swagit not in good working order and used under normal operating conditions, will be fully replaced for a period of three (3) years; (ii) thereafter, all costs of streaming server hardware replacement due to any failure or caused by normal wear and tear, shall be at the County's expense; (iii) all operating and proprietary software for any streaming server shall be fully replaced or upgraded, at no cost to the County, for the life of the contract; and, (iv) all hardware and software for the broadcasting equipment (as identified and described in the Scope of Services, page 5, "Cosmos

Broadcast System”), shall be replaced or fixed with respect to each components manufacturer’s warranties.

3.9 Provider’s Service Network. Provider’s content delivery network and service level represents that: (i) it maintains full N+1 redundancy on all service critical-infrastructure in order to protect against outages. Multiple mirror facilities provide diverse geographic redundancy. Within each facility servers have multiple power supplies, network interfaces and RAID protected storage. Provider is connected to upstream bandwidth providers by multiple gigabit uplinks, transitioning to gigabit and ten-gigabit connections to multiple “tier 1” bandwidth providers, offering route diversity and redundancy. These bandwidth providers maintain 24/7 staffs familiar with mitigating Denial of Service attacks, should the need arise, which they have sufficient capacity to absorb-and-filter; (ii) Provider utilizes external, 3rd party monitoring services to track server availability metrics. This service tracks availability from approximately 30 international points which helps isolate regional networking issues, in addition to any centralized failures; (iii) Content is stored and viewable to the public on the Provider’s networks for a period of three years or as defined by the managed services agreement. All Content is stored and backed up offline indefinitely for the life of the Agreement. Content can also be stored locally on the County’s network for an indefinite period of time limited only by storage capacity, with the added benefit of cached delivery to local users. County is consulted before they exceed any storage horizon and may extend the window for additional years; (iv) Content is stored in widely accessible formats and is available for export at any time. Exported data will include multimedia content and associated documents in their native format as well as any structured metadata in XML format. Access to exported content can be via FTP but in such an event the County is encouraged to provide a portable hard drive to ease the transition of storage and bandwidth intensive content; and (v) the County may verify compliance with these policies at any time in consultation with Provider engineers and officers.

Using your published meeting agendas as a guide, Swagit's Managed Service Division (SMSD) index's the meetings without any work from client staff. SMSD will annotate your content by adding jump-to points with specific item headings, giving users the greatest flexibility to find the specific content they need. With these jump-to points, users can step through video by searching for or clicking specific items.

- **Agenda Management Integration**

If meeting packets or other related information is available online, SMSD will link them directly to the video player for easy access.

Broadcast System- Cosmos

Built upon years of industry experience, Cosmos is a complete package of cameras and pro video-switching equipment that enables any client to fully outsource the production and operation of a multiple camera broadcast system to Swagit.

During the meetings or events, Swagit personnel will operate the Cosmos system remotely from their facility in Plano, Texas. The Cosmos system enables Swagit to control and switch from camera to camera depending on events taking place. When bundled with Swagit EASE, Cosmos can offer a full end-to-end "hands-free" solution that requires no client staff involvement for the operation, broadcast and streaming of an event or meeting content.

Cosmos enables detailed direct camera positioning (pan, tilt, zoom, focus, and more), preset-positions, and video settings (white balance, backlight, brightness) for the robotic cameras. Additionally, Cosmos communicates with the switcher to allow direct operation of the 'wipe' function from the camera control GUI. With this powerful package you or Swagit can control all your cameras individually and switch video sources on a video switcher locally or remotely. Cosmos is an invaluable integration of camera-control with switcher operations for use with live production setups like city chambers, churches, meeting rooms, and more.

Cosmos includes 2-4+ robotic (computer-controllable pan/tilt/zoom) cameras and you can choose from two main types: either single-chip (Sony EVI-D80) or 3-chip (Sony BRC-300) depending on your needs and budget. These popular Sony robotic cameras have excellent

video quality and performance. The EVI-D80 and BRC-300 has the ability for panning through wide angles of motion, tilting through large ranges with superb optical zoom, and dual video output of Y/C and composite. They also support both RS232 and RS422 (long distance over 1000 meters) control signals. In addition the EVI-D80 cameras can be mounted either 'up' or 'hanging upside down' for your convenience (they have built-in reversal of the picture and left/right/up/down motion controls).
