COMPLETED ADDENDUM SHOULD NOT EXCEED 3 PAGES

Agency Name: Johnson County

Application title: Johnson County Live Scan Fingerprint Program

Application #:

Location of Agency Headquarters:

CJD amount requested for this project: \$12,060.00

Is this a collaborative project?

YES _____

NO X

- 1. PROJECT SUMMARY:** Briefly summarize the entire application. Descriptors may include but are not limited to describing problem to be addressed, activities, goal and objectives, and how budget items will be used in carrying out the project.

Currently the Johnson County Sheriff's Office provides fingerprinting services to meet community needs to apply for their Concealed Handgun License (CHL), various school employees and volunteers, churches and church volunteers, as well as other organizations that come into contact or provide services to children. Also currently the Johnson County Sheriff's Office has nearly 700 sex offenders who must report and register with the Sheriff's Office as part of our Sex Offender Compliance Program. Offenders reporting as a requirement to this program are required to provide fingerprints. The Sheriff's Office also assists crime victims that have fallen prey to identity theft, are required to provide prints of Deputy and jailer applicants, and work multiple crimes each year where fingerprints could be used to identify the perpetrators of these crimes.

This project promotes and complements the criminal justice system (Crime Date) in that it quickly confirms the identity of arrested persons. The means of collecting digital finger/palm prints provides instance and accurate identification of criminals that are booked into the Johnson County Law Enforcement Center. This information is then transferred (identification & incarceration) to DPS, Homeland Security and the FBI as accurate and confirmed "crime data" on individuals that have been arrested for criminal offenses. This specific information is very important to all parties that are involved in the criminal justice system, from the arresting officer & agency, to the criminal justice "prosecution" phase, to the prison system "incarceration" phase, to the documentation and tracking of criminal history of offenders. All of this is specific crime data that is paramount to the success of the criminal justice system.

The implementation of an electronic fingerprinting system with AFIS/Live Scan capabilities (System Improvement) will ensure the timely and accurate identification of arrested persons and sex offenders by this department and other departments' utilizing the system. This will enhance the criminal justice system's ability to protect citizens, correctly identify offenders at time of arrest, apprehend wanted offenders through positive identification at the time of arrest, and positively identify sex offenders at

initial registration and during renewal periods. To positively identify an arrested person prior to their release from custody. To submit arrest information (Crime Data) by electronic submission to the Federal Bureau of Investigation, Homeland Security and the Texas Department of Public Safety for class C misdemeanor offenses and all arrest charges for mandatorily required charges for a Class B misdemeanor or better misdemeanor offenses and all felony offenses. To increase the efficiency of our department and other departments who utilize the electronic fingerprinting system through a regional information-sharing system such as AFIS/Live Scan systems. To reduce the labor intensive workload of investigators, who are trying to positively identify suspect's latent fingerprints left at a crime scene.
