I am requesting this training because it involves Death Investigation and the growing Trends and latest Forensic technologies and processes that are available for Death Investigations. This training also has workshops for Opioid/Drug Overdose Investigation and Child Death Investigation. Johnson County and other surrounding agencies have seen an up-rise in overdose death investigation including but not limited to Fentanyl overdoses.

The Johnson County Medical Examiner's Office sends two people to this training each year and I feel that it is very important that we are working on the same page for these cases. There is not another training in Texas that I have found that meets the criteria and expertise that will be given in this Symposium.

Thanks,
