Where should emergency rescue systems be located?

Accidents and injuries can happen anywhere at any time. Emergency rescue systems, just like AEDs, should be readily available and easily accessible in all public locations – from large corporate buildings to schools and public parks. Access to medical supplies and real-time treatment instructions empowers untrained rescuers to help victims when it is needed most.

Customized Deployments to Suit Your Unique Needs

Different Mobilize Rescue Systems are available to suit all types of needs. You can mix and match products to ensure key medical supplies are always available in multiple locations.

COMPREHENSIVE AND MOBILE

The Comprehensive and Mobile systems include our most extensive set of medical supplies to help manage life-threatening conditions such as severe bleeding, seizures, and choking as well as more common injuries such as broken bones, allergic reactions, and burns. Featuring a built-in tablet with the integrated Mobilize Rescue app, both systems are designed for the possibility of treating multiple victims.

PUBLIC ACCESS

Designed to help organizations prepare for medical emergencies with one or multiple victims, the Public Access rescue system includes four individual Utility kits that can be used by multiple rescuers at the same time. The Mobilize Rescue app can easily be distributed, enabling anyone to help in an emergency by simply accessing the app on their smartphone.

COMPACT AND UTILITY

The smaller, lightweight Compact and Utility kits can be kept in the office, in work trucks, or taken with you on the go. Each kit includes supplies to manage severe bleeding, airway complications, hypothermia, and more. The supplies in each kit pair with the Mobilize Rescue app (Compact kit includes a multi-user license; Utility kit includes an individual user license). Any user with the Mobilize Rescue app installed on their smartphone can help provide care in an emergency by simply following the interactive, real-time treatment instructions provided.

EQUIP. EMPOWER. RESPOND.

BE READY FOR THE RESCUE WITH MOBILIZE

When medical emergencies occur, the faster care can be provided, the better the outcome. Bystanders are often a victim's best hope for survival, but they don't always have the training or equipment they need to help.

You will be prepared for the unexpected with Mobilize Rescue Systems™. The integrated system of medical supplies and an interactive app allows even untrained bystanders to assess and manage trauma and injuries in the critical moments before EMS arrives on scene.

Diagnostic prompts and real-time, interactive instructions provided through the app enable bystanders to manage a wide range of medical issues including severe bleeding, choking, seizures, traumatic injuries, burns, hypothermia, broken bones, and more.

“The Mobilize unit definitely gave me courage to be able to do what we had to do, in order to help someone that was really in need.”
– Chris Culver, Director of Baseball and Softball, Pinnacle Athletic Center

Real-time Instructions at Your Fingertips

Each Mobilize Rescue System includes access to the Mobilize Rescue app. The app provides real-time, interactive instructions on how to assess, monitor, and manage care and provide treatment using the medical supplies in the kit.

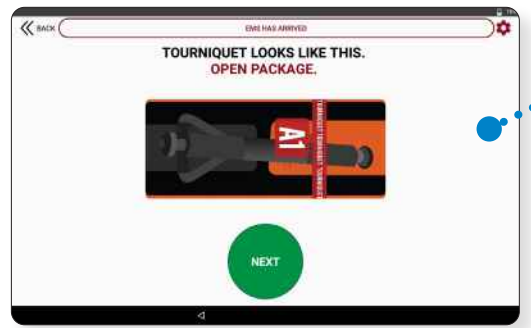

The easy-to-follow diagnostic prompts enable anyone, trained or untrained, to help in an emergency. The Mobilize Rescue app uses interactive prompts, simple written instructions, and visual cues. It also offers additional descriptions of symptoms to help determine what is wrong and describe the steps for appropriate care. This innovative app will give you the confidence to assess, manage, and treat a multitude of medical issues, even if you have no emergency training.

An Integrated System

Designed for ease of use, the medical supplies in the rescue systems are conveniently labeled and organized to match the instructions in the Mobilize Rescue app. Each item is color-coded and numbered, making it easy to locate the items you need and saving valuable time during an emergency.

Support Throughout the Rescue:

- Comprehensive set of medical supplies pairs with an intuitive instructional app
- Interactive prompts comprised of mostly yes or no questions
- Detailed, step-by-step guidance on how to assess and treat patients
- Easy-to-follow text and color graphics
- “More info” buttons offer additional help
- Color-coded supplies with alpha-numeric labels correspond to the instructions in the app
- Time-stamped record of actions taken is available to share with EMS

TREATMENT CAPABILITIES

With Mobilize Rescue Systems, organizations can efficiently and effectively prepare to manage a wide range of medical emergencies.

| + ALLERGIC REACTIONS | + AED APPLICATION |

WHY MOBILIZE?

Severe bleeding can become fatal in 3-5 minutes¹ and airway complications can cause hypoxic brain death in as little as six minutes.² That's why it is critical that ordinary citizens be prepared to deal with unexpected medical emergencies while they wait for professional first responders.

9-15 MINUTES

AVERAGE EMS RESPONSE TIME⁶

TIME TO FATALITY

3-5 MINUTES | SEVERE BLEEDING

6 MINUTES | AIRWAY ISSUES

TRAUMA IS THE #1 CAUSE OF DEATH FOR AGES 1-46

According to the National Trauma Institute, trauma is the leading cause of death for those between the ages of 1 and 46, accounting for 30% of all lives lost in the U.S.³

30,000 PREVENTABLE TRAUMATIC DEATHS

The American College of Surgeons estimates that 30,000 traumatic deaths could be prevented each year with increased access to trauma care.⁴

Empowering Bystanders to Help Save Lives

Accidents, medical emergencies, and acts of violence can occur without notice. Treatment in the first few minutes has a significant impact on patient outcomes. Ensuring bystanders have access to medical supplies and instructions on how to provide care can help save lives.

The Mobilize Rescue System was designed to cover the most critical emergencies – such as severe bleeding, airway complications, and traumatic injuries. Each kit contains a comprehensive set of modern medical supplies and an integrated instructional app, which used together enable bystanders to quickly assess, manage, and treat victims while EMS is on the way.

“the fate of the wounded rests with the one who applies the first dressing”

Dr. Nicolas Senn, President,
American Medical Assn., 1897-1898

TRAINING FADES QUICKLY

**ONLY
33%**

**RETAIN TRAINING AFTER
THREE MONTHS**

**ONLY
10%**

**PASSED A SKILLS EXAM
AFTER 12 MONTHS**

In a survey of CPR studies, investigators found that 67% of participants failed a practical skills exam 90 days after taking an instructor-led CPR/AED class, and that 90% failed the practical skills exam 12 months after the class.⁵

Real-Time Instructions at Your Finger Tips

Training can often be forgotten in the chaos of a medical emergency. The Mobilize Rescue app included with each system provides real-time, step-by-step instructions that enable rescuers to immediately help a victim regardless of their level of training.

The supplies in the system are conveniently labeled and organized to match the instructions in the Mobilize Rescue app. Simple interactive prompts, written instructions, and visual cues guide rescuers to use the medical supplies to provide care during a medical emergency.

Prepared for the Unexpected

Preparing for cardiac emergencies, traumatic injuries, acts of violence, and life-threatening medical issues is key for safety leaders across all industries. Mobilize Rescue Systems offer the peace of mind that comes with knowing you are prepared and ready to manage a wide range of critical medical emergencies. Mobilize Rescue Systems empower bystanders to help save lives.

TREATMENT CAPABILITIES

With the supplies and app in the Mobilize Rescue System, organizations can efficiently and effectively prepare to manage:

SEVERE BLEEDING	IMPALED OBJECTS	BURNS
UNCONSCIOUSNESS	AMPUTATIONS	FRACTURES & SPRAINS
TROUBLE BREATHING	ALLERGIC REACTIONS	DIABETIC PROBLEMS
OPIATE OVERDOSES	CONFUSION	CHEST PAIN
HYPOTHERMIA	STINGS	CPR INSTRUCTION
SEIZURES	TRAPPED LIMBS	AED APPLICATION
CHOKING	PAIN
