Arcosa Aggregates – Texas Region
401 South I-45
Ferris, TX 75125
T 972-544-5900

Date: March 01, 2026

To: Arcosa Aggregates Customers

At Arcosa Aggregates, we strive to consistently provide high-quality construction aggregate materials and outstanding customer service through the safe and efficient operations of our Aggregate plants. Petroleum-based products are used in several steps of the production process: diesel fuel to power heavy mobile equipment (excavators, dozers, front-end loaders, in-plant haul trucks), drilling & blasting (diesel to power drills and delivery of petroleum-based blasting materials), and lubricants for maintaining production plant and mobile equipment.

Due to recent and ongoing volatility in and the significant increases in fuel costs, we need to implement a Production Fuel Surcharge (PFS) linked to the escalating cost of diesel fuel and other petroleum-based products used in the production process at our aggregate plants.

Effective April 1, 2026, the PFS will be applied and adjusted weekly to all invoices as detailed in the chart below. The benchmark diesel price used for the surcharge is based on the US Energy Information Administration (EIA) On-Highway Diesel Fuel Price Index for the regions where our plants are located. This index is updated weekly and can be found at www.eia.gov.

We sincerely appreciate your understanding and continued support.

Sincerely,

Matthew Hallmark
General Manager, Texas Region
Arcosa Aggregates, Inc
